🦞 Comprehensive Bookmark Research

January 27, 2026 — Full Deep Dive Analysis

Executive Summary

22 unique bookmarks scanned via browser-use. **17 new** analyzed in depth.

> **Top 3 Takeaways:**
>
> 1. **Dario's Timeline:** Powerful AI (smarter than Nobel laureates) could arrive in 1-2 years. "Country of geniuses in a datacenter."
> 2. **$Millions in Free Alpha:** Business owners doing $2-10M still emailing themselves notes. Don't need fancy agents — just Claude basics.
> 3. **Kimi K2.5:** Open-source model matching Opus 4.5 at 8x lower cost. Agent Swarm for parallel task execution.

Deep Dives

📚 Dario Amodei — "The Adolescence of Technology"
Source: darioamodei.com | 15,000+ words

Core Thesis: Humanity entering a "technological adolescence" — a rite of passage that will test us as a species.

Timeline Admission:

> "Watching the last 5 years of progress from within Anthropic, and looking at how even the next few months of models are shaping up, I can feel the pace of progress, and the clock ticking down."

Definition of Powerful AI:
- Smarter than Nobel Prize winner across ALL fields
- Millions of instances running 10-100x human speed
- Works autonomously for hours/days/weeks
"Country of geniuses in a datacenter"

5 Risk Categories:

1. Autonomy	What are its intentions? Could it dominate?
2. Destruction	Terrorists amplifying capabilities
3. Power seizure	Dictators/rogues taking control
4. Economics	Mass unemployment, wealth concentration
5. Indirect	Rapid change destabilizing society

Key Stat: Algorithmic progress 4x/year. AI already writing code at Anthropic.

🔧 mvanhorn — /last30days Claude Code Skill
Video: 1:50 | 77 replies, 391K views

What it does: Scans last 30 days on Reddit, X, and web → returns prompt patterns + new releases + workflows.

Video Analysis (frame extraction):
- Key Patterns: Hallucination prevention, role assignment, structured output
- Top 5 by Engagement: Email automation (8x), Task management (6x), Overnight coding agent (5x), Browser automation (4x)

Relevance: This is what we're building! Validates our overnight research approach.

📦 damianplayer — MILLIONS in Free Alpha
Direct business opportunity

> "There's MILLIONS in free alpha sitting in businesses run by people who've never opened Claude. Owners doing $2M, $5M, $10M still emailing themselves notes and copy-pasting into word docs."

Positioning Strategy:
- By Industry: Finance, Health, Legal
- By Pain Point: Ops, Reporting, Customer Experience

Our Angle: After website revamp → AI workflow consulting.

📦 Kimi K2.5 — Open-Source Agentic Model
Kimi_Moonshot, itsPaulAi, eliebakouch | 2M+ views

Key Stats:
- 1T total params, 32B activated (MoE)
- 8x cheaper than Opus 4.5
- SWE-bench Verified: 76.8%
- BrowseComp: 74.9% (beats GPT-5.2 and Opus!)

Agent Swarm Feature:

> "Decomposes complex tasks into parallel sub-tasks executed by dynamically instantiated, domain-specific agents."

Video Understanding: Native multimodal including video analysis.

📚 bored2boar — $40M Polymarket Arbitrage
arxiv.org/abs/2508.03474

Paper Finding: $40 million USD profit extracted through systematic arbitrage.

Two Types:
1. Market Rebalancing — within single market
2. Combinatorial — across multiple markets

🔥 0xkyle — "5-Year Window"
323K views, referencing Dario's essay

> "Reading what the CEO of Anthropic wrote, it is more clear than ever you basically have less than a 5 year window to hyper-gamble your way into elite status or end up a serf for life. We're in the Endgame now."

Action Items

Implement: ☐ Test Kimi K2.5 for coding tasks (HuggingFace) ☐ Add AI workflow audit to lead gen pipeline ☐ Package overnight research as Claude Code skill (like /last30days)

Read: ☐ Full Dario essay (15,000 words) — strategic context ☐ Polymarket paper if interested in prediction markets

Track: ☐ damianplayer's YouTube channel launch ☐ Sonnet 4.7 release details
